## Betta 2 automatic floating pool skimmer

- Is now driven directly by the new and innovative chip-controlled twin Salt Chlorine Tolerant SCT Motors with top efficiency and reliability and provides trouble-free cleaning of pool surfaces all season long. With the unique wireless remote-control function, it can be switched instantly between automatic and remote-control mode. The top basket handle makes it easy to empty the large debris basket.

### About The Betta 2.

Runs completely on solar power. Betta automatically cleans various floating debris on the water's surface; such as leaves, dust, pollen, dead insects, etc. With four water depth bumper rods, Betta uses ultrasonic radar senses obstacles and automatically reroutes itself to clean the entire pool.

- Uses new and innovative twin Salt Chlorine Tolerant (SCT) Motors directly drive the propellers. The innovative technology makes Betta much more reliable, responsive and energy efficient. It reliably delivers excellent cleaning performance in both freshwater and saltwater pools.
- Comes with a large debris basket. With a handle and fine mesh filter, there is no need to remove Betta from the water to clean the debris basket. Simply dock it, open the cover and take out the basket.
- The special UV resistant coating and material prevent damages caused by ultraviolet radiation emitted by the sun
- Comes with 1-year warranty. Wave goodbye to long cables that get in the way. Wireless remote control function is convenient for you to easily switch between automatic and remote control use.
